

EOI: Cashew Kernel Supply from Ghana to Brazil

A Brazilian company requires the below specified cashew kernels:

- Cashew kernels W240 from 2017 crop with Humidity of 5.0%max, Peroxide value of Max 1.0 with equivalent peroxide/kg fat, Free fatty Acid 0.7 % max and free from insect damage, mould, rancidness, residues, extraneous material, kernel in White;
- Cashew Kernels we purchase will need always the origin certificate from Ghana, because Ghana is one of the few places our country can purchase it from;
- Product vacuum packed in 25lbs or 50lbs neutral carton boxes, with nothing printed or written on it;
- Analysis certificate that includes Aflatoxin analysis.
- Fumigation requirements (even for Samples): "Shipping requires phytosanitary inspection at the point of entry. The consignment must be accompanied by the corresponding Phytosanitary Certificate or Phytosanitary Certificate of Re-export, with the following Additional Declaration: - DA2: The consignment was treated with (specify product, concentration, temperature and exposure time) for the control of Trogoderma granarium under supervision official. The product must be packaged in a new, first-use bag and must be free of soil material and vegetable waste."

Destination Port: Port of Santos;

Payment Terms: Payment terms would be 30% payment on confirmed order and balance after BL and all other relevant shipping documents;
